

Nature meets innovation

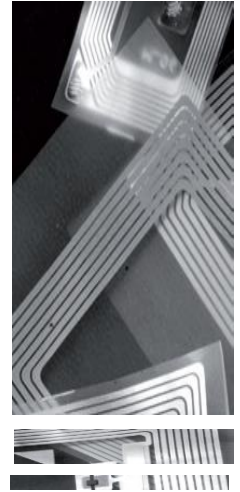

SMART CITY BLUE
the innovative product
by
Sartori BlueHiTech

New energy solutions

Security and tracking systems

2013 SARTORI BLUEHITECH celebrates its 50 years with the introduction of an innovative product an excellent way of addressing societal and urban challenges such as energy efficiency, environmental quality, communication facilities and integrating customized solutions, created to integrate complex structures such as skyscrapers, Hospitals, shopping center....

Smart City Blue

Advanced communications

Building automation

Smart City Blue

A SMART APPROACH TO TECHNOLOGY...

THE INNOVATIVE STRUCTURED PROPOSAL, CLEAR AND COMPLETE
.....GET SMARTER!

- FOR A SMARTER CITY, NOT JUST NICE TO LIVE IN BUT ALSO FOR MAKING ECONOMIC SENSE
- TO MAKE URBAN LIVING MORE SUSTAINABLE ACTIVELY TO IMPROVE THE CITIZENS QUALITY OF LIFE
- BLUE SKYSCRAPERS ENVIRONMENTALLY FRIENDLY TECHNOLOGY COMBINED WITH ENERGY EFFICIENCY

Smart City Blue

EFFICIENCY

Energy Optimization

- Smarter cities starts with making buildings smarter increasing performance with energy efficiency and optimized use of resources obtaining energy savings and assured comfort;
- Combine the power with other sectors: energy and mobility;
- Awareness for energy efficiency : BLUE BUILDINGS MONITORS collect and analyze the extensive data generated every second of every day.

Technical data on request

PHOTOVOLTAIC

Daylight Saving

Photovoltaic systems made with high efficiency modules and positive tolerance frame, in silver strong anodised aluminum corrosion resistant, able to maximize production complete management of all steps leading to the construction of the plant and ensure its performance with after sales services.

Technical data on request

COGENERATION

Energy Payback

Able to meet every need..... combined heat and power System is the ability to create two forms of energy from a single source, obtaining high efficiency and guaranteed savings, it can be used in any site with needs for electricity and heat such as sport and industrial facilities, shopping center, leisure centres, hospitals and care homes, schools, offices and housing developments...

Technical data on request.

CONNECTIVITY

Communicate. Everywhere

The smart city is about connectivity: connectivity of systems, devices, data, people, organisations. Connectivity between all kinds of things, on all kinds of levels, a real time services, efficient and with the advantage of been connected everywhere at all times, networks and infrastructures for communication and data exchange, innovative and technologically advanced;

Technical data on request.

SECURITY

Smart Look

Surveillance systems for security and control of sensitive areas where constant surveillance is needed; a large number of fixed night & day cameras can be deployed on the system, and therefore making it suitable for its usage as an integrated safety and security solution for any application.

Technical data on request.

MOBILITY

Yes: Your Electric Station

Sustainable mobility through cutting-edge charging stations, the technologically advanced and smart electric vehicle charging infrastructure which will be available 24 hours a day, seven days a week, charging itself will be simple: once connected to the station charging takes place automatically it also offers different options for customizing and personalizing charging.
